

Research Associate – Jaffe Lab

Job Summary:

The [Jaffe Lab](#) at the [Lieber Institute for Brain Development](#) (LIBD) is recruiting a Research Associate in Bioinformatics/Data Science/Computational Biology preferably with previous experience working in human genetics and genomics in postmortem, animal, and cellular data. This position primarily involves processing and integrating large-scale genomics datasets into ongoing institute-wide projects. The successful applicant will use these data to create databases and tools to benefit Lieber Institute researchers. The scientist will be committed to a common mission, a team effort, and collaborations across academia and industry.

Qualifications:

- BA/BS plus experience or MS in computer science, computational biology, biomedical engineering, or a related field
- Proficiency in Linux, and at least one low-level language (e.g. C++, Java, etc)
- Proficiency in database management
- Excellent problem-solving skills
- Excellent written and verbal communication skills

To Apply:

Interested applicants should submit a cover letter, example code, their *curriculum vitae* and the names and contact information of three references to: jobs@libd.org.

EEOC Statement:

The Lieber Institute for Brain Development is proudly an equal employment opportunity and equal professional advancement employer. Employment decisions at the Lieber Institute for Brain Development are based on merit, qualifications, and abilities. It is our policy that the Lieber Institute does not discriminate in employment opportunities on the basis of race, religion, color, sex, age, marital status, national origin or ancestry, citizenship, physical or mental disability, sexual preference/orientation or veteran status with regard to any position or employment for which the applicant or employee is qualified.
